General Description or Required Performance Outcomes:

2.1 General Notes

- Any alternate equipment proposed must be approved by the engineer/owner prior to purchase.
- Any equipment to be in contact with water must be rated for potable water, and NSF rated as applicable.
- Where applicable, follow details from site plans used to install original buried water and electrical lines (see note under new well work regarding electrical cable to new well);
- Site plans are not as-built. Contractor must field locate all newly buried piping, wiring and septic system components prior to digging.
- Contact engineer with any issues noted or proposed changes as necessary.
- Site access via Fish Creek Rd side is limited by 7 ½ ton Bridge. Any equipment heavier will need to be accessed via gated access through Town of Greig Gravel Pit on the Woods Road.

Scope of Work

1. At each of the two water drain pits installed in 2022, provide either 1) a handle and means of operating drain valves without entering the pits, or 2) replace the existing valves with curb stop style valves with curb box and handle (per attached specification, or approved equivalent). Note that any curb stop/valve used must be rated for potable water.
2. At new well, install:
 - a. Submersible pump (Goulds 13GS30, or approved equivalent). Note that design pumping rate is 15 gpm.. Recommended installation depth 300';
 - b. Drop pipe;
 - c. Pitless adaptor;
 - d. Pump electrical wiring;
 - e. Any other associated items to provide an operable submersible pump;
 - f. Water level transmitter (see Water Treatment Schematic);
 - g. Coordinate work with well driller/supplier, etc. as needed.

NOTE: The electrical cable size shown on the site plans from the panel at the bath house to the new well may not be suitable. The contractor will need to coordinate the appropriate cable/wiring scheme from the bath house to the new well with the pump supplier, owner and engineer.

3. At and adjacent to new well, install:
 - a. Second pitless adaptor;

- b. Precast dry well, 4' diameter and 4' depth. Install with minimum 6" stone all around;
 - c. 1-1/2" piping to dry well;
 - d. Check valve within piping between well and dry well;
 - e. All to be below frost, intended to allow artesian well to drain without freezing.
4. Install 1-1/2" HDPE water piping from new well to bath house utility room. In addition to piping shown on plans, may use PE 3408/3608 rated at 150 psi minimum. Piping must be at least 18" below any septic system piping, and at least 10' away from the leach field or septic tank.
5. Adjacent to new well and in-line the piping to the bath house, install a third drain pit to be used to drain the water system below frost. Install a curb stop/box as noted above to allow operation from the surface.
6. In the piping between the well and the new drain pit, install an inline curb stop/ box to allow this piping to be shut off from well and prevent the artesian flow from entering when system is winterized.
7. Within utility room of bath house, install all equipment as noted on "Water Equipment Schematic", dated 09/27/23. All equipment as specified, with any alternates to be approved by the engineer. All equipment to be rated for potable water use/NSF approved. Specifically, please note:
 - a. The pump level equipment (transmitter in well) and controls are intended to monitor the well level and shut the pump off before the level drops below the pump. The system must also allow the pump to operate under normal conditions using a pressure switch.
 - b. It is recommended that equipment be sourced through a local supplier as much as possible, with the intention of a local contact for support during installation and system operation.
 - c. Recommended pressure reducing valve (PRV) setting is 60 psi, or below the upper rating of any equipment installed.
 - d. All equipment to be installed with the ability to drain/winterize system.
 - e. Schematic drawing is a basic representation of the equipment to be installed. Contractor is to provide all materials necessary to make system operable, including any fittings, electrical wiring, etc. that may not be specifically shown.
