Marking

Trees for sale are marked in orange and blue paint. Skid Trails will be marked with red flagging once landing location is determined. Girdling cull trees or any other live trees as an alternative to felling will not be permitted.

Sale Boundaries

The sale boundaries are shown on the attached Sale Map. Trees marked with double stripe blue paint horizontal stripes (=) paint indicate the boundary of the sale area. These trees are not included in the sale and shall not be cut. Only those trees which have been marked or otherwise designated to be cut by Lewis County shall be cut under the terms of this contract.

All trees so marked or designated shall be cut by the Contractor and, if any are not cut, they nevertheless shall be paid for under the terms of this contract. The Contractor may be liable for a penalty of \$250.00 per tree or triple damages or both for cutting unmarked trees.

Log Landing

Previous harvests have attained access from adjoining landowner to the west. Off site access is at the discretion of the contractor. The stone access is only 9' wide and must be considered when reviewing harvest access. The Contractor can establish a new log landing with the approval of the County. Any additional site work to improve the landings to accommodate the specific needs of the Contractor will be done at the Contractor's expense and only with the approval of Lewis County. Landings will be always kept in a neat condition during the sale. The Contractor shall keep landings free of any garbage, oil cans, or debris. The Contractor shall remove or return to the harvest area unused wood brought to the landing from the harvest area. The Contractor shall prevent rutting on landings which may result in channelized sediment flow off the landing. At the completion of the sale, the Contractor shall grade and stabilize the landings to the satisfaction of Lewis County and the parking area will be returned to the original condition. The Contractor shall block with earthen mounds, the entrances to skid trails leading into the woods and at all trail crossings to prevent the access from trail users. No additions or changes to skid trail locations will be made without approval of Lewis County. The Contractor shall cut and open main skid trails first before beginning harvesting within the sale area. All skid trails must be repaired and back bladed at the conclusion of the sale, to the satisfaction of Lewis County. Individual hitches shall be no wider than the skidder. The Contractor shall secure all roads, trails and landings to reduce erosion at all times.

Lewis County reserves the right to require the Contractor to implement erosion and sedimentation controls at any time, which includes, but is not limited to, water bars, broad based dips, corduroy, culverts, temporary bridges, straw bales, seeding and mulching. If soil erosion occurs during harvesting, the Contractor shall install and maintain water bars, broad based dips or other appropriate water control devices at locations determined by the Lewis County. The Contractor shall prevent ruts greater than 18 inches in depth on the access system during active timber harvesting. If ruts approach 18 inches in depth the Contractor shall cease harvesting activities in that area and ameliorate the damaged road or trail. The Contractor shall resume harvesting activities only when conditions improve, or actions are taken to prevent further rutting. Lewis County reserves the right to modify this condition on a case-by-case basis. The Contractor shall level all ruts and secure haul roads to restrict erosion at the completion of the sale to the satisfaction of Lewis County. The Contractor shall prevent ruts on all roads and logging trails that may result in channelized sediment flow.

Harvesting

The Contractor shall fell trees away from private land, designated recreation trails, and water courses whenever possible. If trees accidentally fall over private property boundary lines, across designated recreation trails or into stream channels, the Contractor shall pull back all material immediately. No harvesting operations in conjunction with this sale shall be allowed on adjacent private lands without permission of the owner. The Contractor shall remove immediately any logging debris falling on adjacent private lands. Any damage to adjacent private lands shall be promptly repaired or compensation paid to the owner at expense of Contractor. The Contractor shall keep the sale area free of litter including cans, papers and equipment parts at all times. Active timber harvesting operations and new start-ups will be evaluated throughout the harvest for site conditions that are favorable for the continuation of harvesting operations due to wet conditions. Lewis County may partially or wholly restrict harvesting operations during periods of wet and/or muddy conditions throughout the contract period. Harvesting shall begin in the back of the sale area with work progressing toward the front, cutting all designated trees as the job progresses. Exceptions must be approved by Lewis County. Harvesting may begin as long as it is in compliance with the payment schedule. The Contractor shall leave stump heights, measured on the uphill side, no greater than eight inches. The Contractor shall not leave trees or treetops hung up in the sale area and must pull any hung trees or tree tops down immediately. Lewis County reserves the right to restrict the size of the equipment used if said large equipment is causing unacceptable damage to the site and residual stand. The Contractor shall prevent rutting and soil compaction in the general harvest area (excluding the access system) and take the necessary measures to prevent ruts and soil compaction when ground conditions may not support harvesting equipment. Measures may include but are not limited to corduroy, restricting equipment access, utilizing flotation tires or tracks, or depositing tops in front of harvesting equipment. The Contractor shall cut off close to the stump any saplings two inches or greater in diameter at the stump damaged as a result of timber harvesting activities. No more than 5% of the residual trees greater than 5 inches diameter at breast height within the harvest area may be damaged during the harvest operation. A tree considered to be damaged may include but is not limited to: 1. Damage to the main stem of the residual tree which results in the loss of bark greater than 90 square inches.

2. Greater than 40% damage to the entire root system of the residual tree from soil compaction or disturbance within an area defined by a 20 foot radius from the tree's stem.
3. Greater than 25% damage to the live crown of the residual tree.

Fluid Leak/Spills

The Contractor will be responsible for the control and all costs of clean up and/or collection of fluids leaking from any equipment used on the site. The Contractor must have a spill containment and cleanup kit appropriate for the equipment being used. At a minimum, the kit will contain plugs and clamps to control hydraulic line breaks, a container to collect leaking fluids, fluid absorbent pads and a shovel. Operating any equipment noticeably leaking fluids is prohibited. The Contractor must take action to collect and control fluids leaking from inactive equipment or equipment being maintained or repaired on-site. The collected fluids must then be reused or properly disposed of. For additional information regarding the handling of hazardous materials contact the Spills Hotline number 1-800-457-7362. the following criteria:
