

ADDENDUM No.2
No. 2024-109

911 Tower Remote Access and Surveillance

Date: April 29,2024
To Whom It May Concern:

Here are responses to questions that have been asked in response to this RFP.

1. Can you tell me the bandwidth that is available to be used for the cameras and access control at the tower sites using the microwave? **The current bandwidth of the microwave is a total of 150 mbps. It is expected that up to 120mbps can be safely used for the camera. The camera vendor is expected to verify and coordinate the transmission of this camera data with the Radio vendor EF Johnson and Microwave vendor Aviat on the County's behalf.** Also your microwave vendor will need to provide and configure a port on their switch for us to patch our solution into to use the microwave. **Preferably, this will be arranged. Aviat is the microwave vendor.**
2. Our plan would be to install cameras on the shelter rather than the tower. Based on installation for other counties tower sites coverage is better, installation is easier and there are no special requirements needed for climbing a tower. Is that solution OK? **As long as it gives 100 percent coverage of the specified area, there is no preference of where or how the cameras are installed.**
3. If we needed power and an outlet installed at the gate is that something the county could provide? **The power could most likely come off the shelter location, but it would be the responsibility of the camera vendor to install what is needed to get power from the shelter to the gate area as there is currently none. This project should be bid as turn key.**

The original document said the contract would be awarded on May 7th that is incorrect, the contract will be awarded at the Board of Legislators meeting on June 4, 2024. And again, this RFP is due by 2:00 pm on May 16, 2024

Please reach out if you have any questions.
