

**ADDENDUM No.1**  
**No. 2024-113**  
**911 Radio Tower Inspections**

Date: June 20, 2024

To Whom It May Concern:

In response to questions received from potential bidders, the County provides the following questions and responses:

1. Will there be a bid walk to become more familiar with the equipment at each site?  
**No, the tower at the PSB can be viewed anytime and all towers have identical equipment.**
2. Are there any access issues at each site that a UTV may be needed?  
**No, all sites can be accessed by regular vehicles.**
3. Are all towers and equipment on the tower county owned.  
**Yes, all towers and equipment are County owned.**
4. The paperwork at this time does not state anything about shelter, ice bridge, cable entry pot systems, or other equipment not located directly on the tower... does the county want this material included.  
**It can be included as an extra proposal, but it is not required to submit pricing for this proposal.**
5. Are the antenna sweep tests required?  
**No, this is handled by our Radio Maintenance vendor.**
6. Can the county provide any historical data?  
**No, these towers are approximately 8-10 years old, and were last inspected by the Radio vendor when the Radio project was fully accepted in 2018. This will be the first actual inspection since project signoff.**

7. A question was asked if the County would be interested in leveraging the TIA-222-I inspection standard with the use of Unmanned Aerial Systems.

The county currently is looking for proposals that include climbers physically climbing and inspecting the towers.

8. Can you confirm that all 8 towers are self-support type (as opposed to guyed or monopole)?

All towers are self-supporting.

9. Are any bid, performance, or payment bonds required for this project?

No.

10. Is prevailing wage required for this project?

Yes.
