

ADDENDUM No.2
No. 2025-110
Underground Storage Tank Removal

Date: July 23, 2025

To Whom It May Concern:

Please see below the questions that have been asked regarding this RFP.

Question: We are seeking some clarification of fluids disposal, particularly when it pertains to groundwater (See Section 3.02 -B below). The Bid Form has us pricing out 1,000-gallons based on 10-inches of remaining petroleum in the tank. This equates to approximately 440 gallons remaining in the tank. Once we include rinsate, it may be 500-600 gallons; not leaving us much volume for groundwater handling in the tank grave (if encountered).

If we have to pump, contain and dispose of groundwater from the tank grave, the volumes are typically much higher, yet there is no separate bid item for groundwater handling (if encountered). We can offer an estimated cost apart from Bid Item #3 based on an arbitrary volume of 10,000-gallons. Or, if awarded the job, we could submit a change order at that time for additional groundwater handling if warranted?

Answer: Lump sum bid item number 1, as specified in Summary of Work, Section 01 10 00, requires wash fluids generated by the contractor to be disposed of under this pay item. Wash fluids will not be paid for under unit price item number 3.

Petroleum impacted groundwater, if encountered, will be paid for under unit price item number 3, as will remaining tank fluids, also as specified in Summary of Work, Section 01 10 00.

Quantities encountered in excess of those estimated and to be included in the bid can be addressed by change order.

Please reach out if you have any questions.
